

Odor Control

Product Description

The 935 Block is a Gel-Paste product specially packaged for easy application directly in areas emitting bad odors, leaving a fresh, clean fragrance.

To assure optimal performance of this product under the toughest conditions, it has been produced and blended together with "high potency" humectants, activated charcoal, and reagents. The activated charcoal not only control malodors but literally "draws" them in to neutralize it.

The 935 Block is ideal for the use in homes where disasters have occurred such as flooding or smoke damage, in kitchens and bathrooms where mold, mildew, and stagnant air can linger, in basements where musty or stale odors have accumulated, and in areas where fumes may accumulate from decorating with oil, latex paint, adhesives, staining, and varnishing products.

The 935 Block is not only efficient in neutralizing odors caused by formaldehyde and ammonia, but also in buses and trains where body odor can be a problem due to the confined space. When used as directed, the 935 Block is safe for people, clothing and the environment. This product is non-toxic, non-flammable and is approved for continuous use.

Recommended Placement Areas

- Place the 935 container inside the supply air plenum area, behind the air filter in front of the coils air system.
- Inside air ducting
- Areas affected by unpleasant constant odor.

For maximum effectiveness up turn the 935 container. Turn the contents of the 935 container upside down onto its lid and slide the container off to allow full exposure of the block for maximum effect.

Specifications

Form: Gel-Paste
 Color: Blue-Green or Purple
 Fragrance: Fresh scent or Berry
 Active Content: Surfactants, Odor Modifiers, Activated Charcoal

Steps to be taken if material is released or spilled

Wear eye and skin protection. Avoid discharge to natural waters. Small spillages can be washed away with large amounts of water. Large spillages, if contained, can be returned to container.

For Disposal of Neat, Unused Product

Incinerate in furnace where permitted under Federal, State and local regulation.

Odor Neutralizer & Adsorbant
